

School insurance

Insurance for educational institutions

Whether you are an Academy or an Independent School, over the years we have witnessed a growth in the demand for a quality service and independent advice around your very specific insurance and risk management requirements.

The drive towards greater independence and choice for a growing number of schools, together with the rapid increase in financial investment, points to the need for professional advice on how to best manage risk whilst acquiring appropriate and cost effective insurance protection in place. We recognise that every school or academy is not exposed to the same level of risk. The buildings, vehicles, equipment and facilities of one school can be dramatically different to another.

We recognise that every school or academy has its own nuances which need careful consideration. Our school clients have chosen us because of the importance we place upon understanding these often unique requirements. We encourage a partnership approach with the school, ourselves and the ultimate insurer of choice.

Our approach is to produce a tailored policy, unique to your school or academy. Secure Risk Solutions is passionate about providing quality insurance and risk management solutions for schools, so that you can focus on your pupils and your school's future.

Staff absence insurance

If, like most schools or academies, you are working to a tight budget, you might not find it easy to balance the cost of temporary staff in the event that some of your teachers are absent. Staff absence and sickness cover will save you what can be unbearable costs from staff absence.
